Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

Election/Restriction

A further restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 13, 15, 17, 19 and 26-37, drawn to a method for treating cancer comprising administering to a subject an effective amount of a first compound which is a nucleic acid molecule as activator of cytokine receptors, and a second compound which is 4-1BB ligand or derivative, classified in class 514, subclass 2.
- II. Claim 26, drawn to a method for treating cancer comprising administering to a subject an effective amount of a first compound which is a nucleic acid molecule as activator of cytokine receptors, and a second compound which is a nucleotide sequence encoding 4-1BB ligand or derivative, classified in class 514, subclass 44.
- III. Claim 26, drawn to a method for treating cancer comprising administering to a subject an effective amount of a first compound which is a cytokine as activator of cytokine receptors, and a second compound which is 4-1BB ligand or derivative, classified in class 514, subclass 12.
- IV. Claim 26, drawn to a method for treating cancer comprising administering to a subject an effective amount of a first compound which is a cytokine as activator of cytokine receptors, and a second compound which is a nucleotide sequence encoding 4-1BB ligand or derivative, classified in class 514, subclass 2.

In addition, upon the election of any of groups I-IV, further election of the following patentably distinct species of the claimed invention is required:

IL-12, IL-15 or IL-18

The inventions are distinct, each from the other because:

Art Unit: 1632

The Inventions I-IV are distinct from each other because they differ at least in method steps, reagents and/or dosages, and/or schedules used, response variables, and criteria for success.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, because of their recognized divergent subject matter, and the search required for any group is not required for remaining groups, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143.).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Liping Chen, whose telephone number is (703) 305-4842.
